| Type | RefName         | Description                                                                                                                                                        |
|------|-----------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Item | LBCAT_001_24    | Used to define a category of related laboratory records (e.g. HEMATOLOGY, CHEMISTRY, URINALYSIS).                                                                  |
| Item | LBSCAT_001_24   | Used to define a sub-category of related laboratory records (e.g. Electrolytes, Liver Function).                                                                   |
| Item | LBSPEC_001_24   | Defines the type of specimen used for a measurement. Examples: SERUM, PLASMA, URINE.                                                                               |
| Item | LBDTC_001_24    | Date of specimen collection.                                                                                                                                       |
| Item | LBSPID_001_24   | Sponsor-defined reference number. This is the Pfizer PXCODE.                                                                                                       |
| Item | LBTEST_001_24   | Verbatim name of the test or examination used to obtain the measurement or finding. Any test normally performed by a clinical laboratory is considered a lab test. |
| Item | LBORRES_001_24  | Result of the measurement or finding as originally received or collected.                                                                                          |
| Item | LBSTAT_001_24   | Used to indicate test was not done.                                                                                                                                |
| Item | LBORNRLO_001_24 | LNMT field                                                                                                                                                         |
| Item | LBORNRHI_001_24 | LNMT field                                                                                                                                                         |
| Item | LBORRESU_001_24 | LNMT field                                                                                                                                                         |

Study Object Descriptions: LABORATORY DATA - IMMUNOGLOBULINS2

| Type | RefName      | Description                                                                                       |
|------|--------------|---------------------------------------------------------------------------------------------------|
| Item | LBCAT_001_26 | Used to define a category of related laboratory records (e.g. HEMATOLOGY, CHEMISTRY, URINALYSIS). |

file:///C:/Users/SURESRO8/AppData/Local/Apps/2.0/YH3HXBME.3HB/99OHV5JV.TKA/orac..90.0 919f856034ae8f10\_00... 23-07-2025

|      |                 |                                                                                                                                                                    |
|------|-----------------|--------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Item | LBSCAT_001_26   | Used to define a sub-category of related laboratory records (e.g. Electrolytes, Liver Function).                                                                   |
| Item | LBSPEC_001_26   | Defines the type of specimen used for a measurement. Examples: SERUM, PLASMA, URINE.                                                                               |
| Item | LBDTC_001_26    | Date of specimen collection.                                                                                                                                       |
| Item | LBSPID_001_26   | Sponsor-defined reference number. This is the Pfizer PXCODE.                                                                                                       |
| Item | LBTEST_001_26   | Verbatim name of the test or examination used to obtain the measurement or finding. Any test normally performed by a clinical laboratory is considered a lab test. |
| Item | LBORRES_001_26  | Result of the measurement or finding as originally received or collected.                                                                                          |
| Item | LBSTAT_001_26   | Used to indicate test was not done.                                                                                                                                |
| Item | LBORNRO_001_26  | LNMT field                                                                                                                                                         |
| Item | LBORNRI_001_26  | LNMT field                                                                                                                                                         |

C1071007: LOCALLY READ ECGs 1 (ECG 1) [EG001]

Locally Read ECGs [EG01001]

1.

Repeat Number: *[read-only]*  
[Sponsor-Defined Identifier]

[EGSPID\_001]  
[A:1] ☐ 1ST ECG READING

2.\*

ECG Date Time:  
[ECG Date Time:]

[EGDTC\_001] (DD/MM/YYYY hh:mm)  
Req  / Req  / Req  (2022-2032)  
Req  : Req  24-hour clock

3.\*

Was ECG:  
[ECG Interpretation]

[EGORRES\_INTP\_001]  
[A:1] ☐ [SUPPEG\_EGCLSIG\_CMP\_001] ☐  
ABNORMAL  
[SUPPEG\_EGCLSIG\_001]  
If abnormal, was the overall ECG clinically significant?  
[A:Y] ☐ [SUPPEG\_EGCOM\_CMP\_001] ☐  
YES  
[CO\_EGCOM\_001]  
Comments on significant findings: (If clinically significant, record on the [ insert protocol specific requirement e.g. Adverse Event page, Medical History page, Sign and Symptoms of Disease page ])  
A200\*

[A:N] ☐ NO  
[A:2] ☐ INDETERMINATE  
[A:3] ☐ NORMAL

ECG Results [EG02001]

C1071007: LOCALLY READ ECGs 3 (ECG 3) [EG001\_5]

Locally Read ECGs [EG01001\_5]

1.

Repeat Number: *[read-only]*  
[Sponsor-Defined Identifier]

[EGSPID\_001\_5]  
[A:3] ☐ 3RD ECG READING

2.\*

ECG Date Time:  
[ECG Date Time:]

[EGDTC\_001\_5] (DD/MM/YYYY hh:mm)  
Req  / Req  / Req  (2022-2032)  
Req  : Req  24-hour clock

3.\*

Was ECG:  
[ECG Interpretation]

[EGORRES\_INTP\_001\_5]  
[A:1] ☐ [SUPPEG\_EGCLSIG\_CMP\_001\_5] ☐  
ABNORMAL  
[SUPPEG\_EGCLSIG\_001\_5]  
If abnormal, was the overall ECG clinically significant?  
[A:Y] ☐ [SUPPEG\_EGCOM\_CMP\_001\_5] ☐  
YES  
[CO\_EGCOM\_001\_5]  
Comments on significant findings: (If clinically significant, record on the [ insert protocol specific requirement e.g. Adverse Event page, Medical History page, Sign and Symptoms of Disease page ])  
A200\*

[A:N] ☐ NO  
[A:2] ☐ INDETERMINATE  
[A:3] ☐ NORMAL

ECG Results [EG02001\_5]

| #   | ECG Test Name                        | Result* | Unit      |
|-----|--------------------------------------|---------|-----------|
| 4.a | QT INTERVAL NOT OTHERWISE SPECIFIED  |         | msec      |

| Form | AE001_1               | AE001 - Standard AE Page                                                      |
| Item | AECAT_001_1           | Used to define a category of adverse event variables.                         |
| Item | AETERM_001_1          | Verbatim (i.e., investigator-reported term) description of the adverse event. |
| Item | SUPPAE_AETRNMAM_001_1 | Drug Name                                                                     |
| Item | SUPPAE_AEIPKGID_001_1 | Incorrect Package ID                                                          |
| Item | AESTDTC_001_1         | Date when the adverse event started.                                          |

|      |                      |                                                                                                                                                                                                                                                            |
|------|----------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Item | AEENDTC_001_1        | Date when the adverse event resolved.                                                                                                                                                                                                                      |
| Item | SUPPAE_AEMEACN_001_1 | Changes made to the study treatment in response to the medication error adverse event.                                                                                                                                                                     |
| Item | SUPPAE_AECMGIV_001_1 | Concomitant Medications Given                                                                                                                                                                                                                              |
| Item | SUPPAE_AENDGIV_001_1 | Non-Drug Treatment Given                                                                                                                                                                                                                                   |
| Item | SUPPAE_AEMEFL_001_1  | Was this medication error associated with any adverse events                                                                                                                                                                                               |
| Item | D_COMPTERM2_001_1    | Hidden Item needed for clear coding rule.                                                                                                                                                                                                                  |
| Item | AELLT_001_1          | Dictionary-derived text description of the Lowest Level Term.                                                                                                                                                                                              |
| Item | AELLTCD_001_1        | Dictionary-derived code for the Lowest Level Term.                                                                                                                                                                                                         |
| Item | AEDECOD_001_1        | Dictionary-derived text description of AETERM or AEMODIFY. Equivalent to the Preferred Term (PT in MedDRA). The sponsor is expected to provide the dictionary name and version used to map the terms utilizing the define.xml external codelist attributes |
| Item | AEPTCD_001_1         | Dictionary-derived code for the Preferred Term.                                                                                                                                                                                                            |
| Item | AEHLT_001_1          | Dictionary-derived text description of the High Level Term for the primary System Organ Class.                                                                                                                                                             |
| Item | AEHLTCD_001_1        | Dictionary-derived code for the High Level Term for the primary System Organ Class.                                                                                                                                                                        |
| Item | AEHLGT_001_1         | Dictionary-derived text description of the High Level Group Term for the primary System Organ Class                                                                                                                                                        |
| Item | AEHLGTCD_001_1       | Dictionary-derived code for the High Level Group Term for the primary System Organ Class.                                                                                                                                                                  |
| Item | AESOC_001_1          | Dictionary-derived text description of the primary System Organ Class. Will be the same as AEBODSYS if the primary SOC was used for analysis.                                                                                                              |
| Item | AESOCCD_001_1        | Dictionary-derived code for the primary System Organ Class. Will be the same as AEBDSYCD if the primary SOC was used for analysis.                                                                                                                         |

| Item | X_CMONGO_001    | Indicates the medication is ongoing when no End Date is provided                                                                                    |
| Item | CMENDTC_001     | Date the subject stopped taking the medication                                                                                                      |
| Item | CMROUTE_001     | The route of administration of the medication                                                                                                       |
| Item | X_CMDSTXT_001   | The dose of medication per administration in character format                                                                                       |
| Item | CMDOSU_001      | The unit associated with the medication taken                                                                                                       |
| Item | CMDOSFRQ_001    | How often the medication was taken                                                                                                                  |
| Item | D_ECTRT1_001    | Name of the study treatment or intervention given per single administration or during the 'constant dosing interval' for the observation.           |
| Item | D_ECSTDTC1_001  | Date when constant dosing interval of the study treatment started or single administration occurred.                                                |
| Item | D_ECONGO_001    | Indicates the medication is ongoing when no End Date is provided                                                                                    |
| Item | D_ECENDTC1_001  | The time when administration of the treatment indicated by EXTRT and EXDOSE ended.                                                                  |
| Item | D_ECROUTE1_001  | This may be collected if it cannot be derived or if there are multiple options. It may also be pre-printed on the CRF or derived from the protocol. |
| Item | D_ECDOSE1_001   | Amount of study treatment administered or given, collected in numeric form. Example: 200.                                                           |
| Item | D_ECDOSEU1_001  | Unit of dose or amount taken per constant dosing interval recorded.                                                                                 |
| Item | D_ECDOSFRQ1_001 | Number of doses given per a specific interval.                                                                                                      |
