

## Study Design Specifications Template Completion Instructions

*This template is used to capture details regarding the study design required in support of your clinical protocol. The following details are required. Please do not alter the structure or formatting of the existing worksheets, do not delete standard columns or change column headers.*

| Worksheet                | Detailed Instructions                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
|--------------------------|------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| Document Version History | Complete the Document version history tab following the instructions provided on the tab. ASB mock up should be referenced in this section along with a summary of changes.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| Time And Events          | Complete Time and Events with the list of unique forms and provide the Study Design Specifications (SDS) in the ticket to initiate database build in Central Designer.<br><br>Please follow instructions on the Time and Events tab to complete the various sections.<br><b>NOTE:</b> this tab will be overwritten at finalization with export from Central Designer.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                      |
| Dynamics                 | Record Dynamics specifications for forms and for visits. Dynamic specifications should be finalized prior to SDS approval.<br><br>Dynamics is a cumulative tab. Update as appropriate and use formatting effects strikethrough functionality for dynamics that are deleted. Record updates on the Document Version History tab.<br><br>Enter NA in the first column first row if there are no Dynamics applicable.<br>Please follow instructions on the Dynamics tab to complete sections.                                                                                                                                                                                                                                                                                                                                                                                                                                                                 |
| Display Overrides        | Record Display Overrides for Rights Groups that differ from 'Item Default Display Override' documented in column P of the Form Metadata tab. This tab should be used if a User Group (known as a Rights Group) should be given a different display override than item default. For example, Serious Adverse Event Number is set to 'read only' as the default but should be updated to 'enterable' for Study Data Set Manager (SDSM) and Lead Data Manager (LDM) Rights Groups.<br><br>Display overrides specifications should be finalized prior to SDS approval.<br>Display Overrides is a cumulative tab. Update as appropriate and use formatting effects strikethrough functionality for overrides that are deleted. Record updates on the Document Version History tab.<br><br>Enter NA in the first column first row if there are no Display Overrides applicable.<br>Please follow instructions on the Display Overrides tab to complete sections. |
| DSOPI-CAL Reference      | Record the Randomization, subject status information. Column headers should not be changed but can add rows when necessary.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                |
| SRDM Reference           | Get the latest SRDM reference from PMDR and modify the rows when necessary. Column headers should not be changed. The rows which are necessary for the study should be highlighted in yellow.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                              |
| Non-CRF Data             | This tab is to be populated with data type and the vendor name used for the study. Create a row for each data type and vendor name. The Data Review Tier column for non-crf data should be completed assessing the entire set of external data (e.g. central lab, ECG) module by module.                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                                   |

|                                                 |                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
|-------------------------------------------------|----------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------------|
| <b>Data Review Tier</b>                         | Percentage of SDV is a product of the the IQMP white boarding process where discussions with the study team determine the appropriate level of SDV required for your study.<br><br>Data review details are to be populated at SDS finalization with an export from Central Designer (Custom Metadata Report). See the Optimizing Data Review training for a full definition of each data .                                                               |
| <b>Study Specific DMW Spec</b>                  | <b>Optional Tab:</b> Only for studies with approval to deviate from the Standard build that will need to document study specific SRDM changes. Studies using standard DMW mapping should delete this unused, optional tab.                                                                                                                                                                                                                               |
| <b>The SDS tabs are color coded as follows:</b> |                                                                                                                                                                                                                                                                                                                                                                                                                                                          |
| <b>Tab Color</b>                                | <b>Completion Details</b>                                                                                                                                                                                                                                                                                                                                                                                                                                |
| <b>Grey</b>                                     | Informational; no changes required                                                                                                                                                                                                                                                                                                                                                                                                                       |
| <b>Yellow</b>                                   | Populated during build or when updates are required after Study Design Specs have been approved.<br>Check for completion/accuracy at time of finalization/sign off.<br><br><b>Note: T&amp;E tab will be over written by Data Management at finalization/sign off with export from Central Designer provided by the InForm Database Programmer (IF DB programmer). See detailed instructions in the Data Management Study Design Activities document.</b> |
| <b>Green</b>                                    | Populated at finalization/sign off by export from Central Designer by Data Management. See detailed instructions in the Oracle Central Designer for the Clinical Data Scientist: User Guide document.                                                                                                                                                                                                                                                    |

## Programming Notes

Value defaulted based on the FORMREFNAME as defined in the study-level reference table.  
RSEVAL\_001 column is added in the study level because it is retired in standard template and however it is required for this study so added defaulted expression to it no metadata change or update needed

In MH001\_2 form, RSORRES\_TNMSTGN\_001\_2 has length mismatch, in 002 INF model length was 4 and 001 SRDM model length was 3 and the start ticket was already raised for this length issues, It please find the start ticket 215977 for your reference, I have confirmed with standards team (@Kumar B, Chetan) they suggest to proceed with the study specific changes, since the changes are not updated in the standard template.

For the item DOV the expression is missing in 001\_SRDM model, Please find the start ticket 218216, for your reference

The item DOV is incorrectly mapped from 900\_FT table instead of mapping it from CM001\_1\_STG, Please find the start ticket 218216 for your reference

PRCAT is not defaulted in InForm as it has more than 1 option and it is enterable by the site hence we need column to capture the codelist PRCAT\_001\_C

PRCAT is not defaulted in InForm as it has more than 1 option and it is enterable by the site hence we need column to capture the Not done value PRCAT\_001\_ND

The length of the column SUPPPC\_PKTERM\_002 has been updated from 100 to 200 to match with the length of the source

Mapped D\_LBORRES\_001\_5 to LBORRES\_001 in STG and the same is mapped to LBORRES\_001 column in SRDM

PRCAT is defaulted in InForm and the site needs the column to capture the codelist PRCAT\_001\_C

PRCAT is defaulted in InForm and the site needs the column to capture the codelist PRCAT\_001\_ND

PRSCAT is not defaulted in InForm as it has more than 1 option and it is enterable by the site hence we need column to capture the codelist PRSCAT\_001\_C

PRSCAT is not defaulted in InForm as it has more than 1 option and it is enterable by the site hence we need column to capture the Not done value PRSCAT\_001\_ND

Since the PRSCAT\_001\_C is collected as an editable item, Hence this is added in SRDM

Since the PRSCAT\_001\_ND is collected as an editable item, Hence this is added in SRDM
